

Meeting Minutes

##9-10-15 @2:00pm##

Discussion Notes:

Action Items brought to the table:

- Reading material
 - Spencer looked over google doc and git material
 - Nate looked mainly over code not much of google or git
 - Dylan looked over all with various levels of detail
- Team Experience:
 - Spencer fine with anything. Prefers not much web dev
 - Dylan knows Ruby
 - Nate is fine with anything but prefers web dev and/or Java technologies
- Concerns:
 - Dylan spoke about some concerns brought up about metrics. The “T” value of the metrics seemed vague, needed clarification on how it was set.
- Questions for Crk
 - “Your review of the project?”
 - Is it GIT specific
 - Any specific language we need to use.
 - What happens to the data
 - Is this a local application
 - Client/Server -> Db
 - Local but with a DB
 - Who is the user
 - Metrics. What are the specifics
 - Custom Abilities
 - Specifics, workflows, Aesthetics.
 - Comments in code
 - Verbose?
 - How much/many/where
 - Design docs
 - What is expected?
 - Do you know about SonarQube
 - Opinions?
 - What do you want in a User guide?
 - Name of the project?

- Proof of concepts
 - Expectations
 - Deliverables?

Action Items to work on for next meeting

- Email Crk (Spencer)
- Jira Learning
- Bitbucket Research
- Out Git workflow definition
- Google Calendar

Other Notes:

Crks Email Specs

Intention: Set up initial meeting

Contents:

- Contact Info
- Our Availability
 - If now we can have a remote meeting with hangouts
- Agenda (1 hour timeframe)
 - Introductions
 - Hash out contact formalities
 - Questions
 - Ending remarks
- Ending remarks

“STAND UPS”

Meeting Twice a week (T, TH) at 4:45-5:15

##Meeting ended at 3:30pm##
